

BARN STORM IODINE CLEANER-SANITIZER

DIN: 00504793

This product is an iodine based cleaner-sanitiser for use in poultry houses, chicken hatcheries and hay barns. It can also be used as an excellent boot wash, sow wash and equipment wash and disinfectant.

DIRECTIONS:

A clean sanitized area will minimize the outbreak of disease and incidents of parasites in hay and poultry operations. Barns, Poultry Houses & Hatcheries Manually scrub and clean all pens, floors and walks; remove soil and manure. Clean feed from feeders and bins. Remove all portable equipment from building. Wash down thoroughly with a pressure washer using detergent. Rinse with clean water. Make a solution of 1.4 ml/L of water (1 oz/4 gallons) to achieve 25 ppm and spray down the interior of the building including equipment. Allow the building to dry without rinsing and ventilate before placing animals in the building.

Sow Washing Use 3 ml/L of water (1 oz/2 gallons) to achieve 50 ppm. Scrub down flanks.

Boot Washing Use 5.7 ml/L of water (1 oz/gallon) to achieve 100 ppm. Disinfect boots by soaking them for 30 seconds in solution before entering the barn.

ACTIVE INGREDIENTS: Nonylphenoxy poly (Ethyleneoxy) Ethanol-Iodine complex, providing available Iodine 1.75% w/v Phosphoric acid 11.25% w/w

CAUTION: Never dilute with hot water.

For Commercial Use Only
