

H-15 TEAT DIP

H-15 is a Chlorhexidine Acetate teat dip solution with Polyvinylpyrrolidone and Glycerine.

DIRECTIONS:

Immediately prior to milking, dip the teats in undiluted product. The teat dip solution in the dip cup should be changed if it becomes visibly dirty, if sediment is introduced, or if blue colour fades noticeably.

NOTE: Do not use for cleaning and/or sanitizing milking equipment. Do not dilute. Use just as it comes in container.

ACTIVE INGREDIENTS: Chlorhexidine Acetate: 0.275% with Polyvinylpyrrolidone.

For Commercial Use Only
