

H-30 TEAT DIP

DIN: 00726990

This product is for routine use to help prevent and control mastitis by reducing the bacteria count on the teat.

ACTIVE INGREDIENTS: Chlorhexidine Acetate - 0.55% Glycerine – 3.0% **DIRECTIONS:** Immediately after each cow is milked, dip the teats in H-30 Teat Dip. Allow the Teat Dip to dry on the teat so that it forms a protective coating until the next milking. Repeat after every milking. Apply H-30 Teat Dip daily for the first week of the dry period. A week before calving, start the daily application again.

NOTE: Do not use for cleaning and/or sanitizing milking equipment.

Do not dilute! Product is ready to use.

For Commercial Use Only
