

Microbicide 10

PCP# 21153.18

USES

- Cooling towers
- Crude oil storage tanks
- Closed heating and cooling loops
- Fuel storage tanks
- Humidification spray pans
- Fire water storage tanks
- Water disposal wells
- Produced water systems

GUARANTEE: 10% active bronopol

PROPERTIES OF BIOCIDES: fast acting, non-ionic/non-foaming, broad spectrum

anti-bacterial, effective at all pH's, biodegradable, odorless

ADVANTAGES:

- Effective against slime forming bacteria
- Compatible with many chemicals in water treatment
- Reduces slime and corrosion – increasing system efficiency

DIRECTIONS FOR USE:

Introduce B-10 Biocide into the system at a convenient point via pot feeder, slug feeder or chemical injection pump. Shock feed 1 gallon per 1000 gallons of system volume to achieve a final concentration of 100 ppm of product. This should be done 2 times per week to maintain proper control of bacteria growth in your system.

For Commercial Use
