

ORGANIC SANITIZER

This product is a hydrogen peroxide based sanitiser ideally suited for use on dairy farms, including organic milk operations.

DIRECTIONS:

For sanitizing of milking equipment, dilute 2 liters in 20 liters of water (16 oz/gal). This will make a 3% hydrogen peroxide concentration.

When using this product for udder washing and pre-dipping, dilute 350 ml in 20 liters of water (2 3/4 oz/gal). This will make a 0.5% hydrogen peroxide concentration.

For Commercial Use Only
