

R-62 EGG WASHING COMPUND

This product is a chlorinated non-foaming egg wash compound designed for use in all sizes of industrial type washers. Ideal for food plant use. It has complete and rapid solubility and is formulated for all types of water conditions.

DIRECTIONS:

Use 2 grams per litre of warm water (1/3 oz/gallon). Water temperature should not exceed 50 °C. Do not wash longer than 5 minutes, allow eggs to dry and cool.

Washed eggs should be thoroughly rinsed with potable water.

For Commercial Use Only
