

## Scales Off

Scales Off is a strong acid descaler to remove large mineral buildup on most surfaces. It is also designed with a surfactant to provide phenomenal cleaning power for removing stains, odors, and cleaning dirty areas.

**DIRECTIONS:** For initial cleaning of toilers, pour 60 ml (2 oz) of Scales Off into toilet or urinal. Mop the entire surface and let it remain for 5 - 10 minutes, then flush. For daily cleaning pour 30 ml (1 oz) of product into bowl or urinal and mop.

**Heavy scale buildup:** Spray directly onto surface to be descaled, allow product to activate and rinse off with water. Be sure to rinse thoroughly and do not allow product to dry.

**Light scale:** Dilute product up to 1:4 and apply as above.

If working on a chrome or metal surface, test product in an inconspicuous area.

### ACTIVE INGREDIENTS:

23.0% hydrogen chloride

0.5% alkyl dimethyl benzyl ammonium chloride

For Commercial Use Only
